

## ***Manual Grande® Series***

### **Section 1: Screen Design**

#### **1.1 What is it?**

The **Manual Grande® Series** is a Large-sized manually operated retractable screen that uses a bead chain clutch system. It employs a very swift rolling mechanism that allows it to stop at any point to prevent from being raised or lowered too far.

#### **1.2 How does it work?**

The housing is of aluminum construction, is moisture resistant and available in a white finish. It is great for large room presentations for use in classrooms, training facilities, lecture halls, and a variety of business applications. The MaxWhite® 1.1 Gain Front Projection material is black-backed to eliminate light penetration for enhanced brightness. It also has black masking borders on all sides to mitigate projector overshoot while enhancing perceived visual contrast.

### **Section 2: Product Features**

#### **2.1 Characteristics**

##### ***Screen Material***

- MaxWhite® 1.1 gain (matte white) front projection material
- Wide diffusion uniformity allows viewers to see the picture from any angle
- 4K Ultra HD, Active 3D, and HDR Ready
- Not compatible with Ultra/Short-throw Projectors
- Black borders absorb projector over scan while enhancing visual contrast
- Black backed screen material eliminates light penetration for superior color reproduction
- Available in the following diagonal sizes:
  - 180" and 200" in 4:3 format
  - 180" and 200" in 16:9 format

##### ***Design and Installation***

- Flush wall installation design with low-profile sliding brackets
- Aluminum moisture resistant arcuate housing in a white finish
- Bead chain clutch system allows screen to roll up/down and stop at any point
- Up and down stops prevent screen from rolling

- Nylon bead chain is durable for daily use
- Cord retainer included for securing bead chain loop

### Quality and Reliability

- GREENGUARD® and GREENGUARD® Gold Certified (UL 2818) for safe indoor emissions
- 5-year manufacturer's warranty

## 2.2 Certifications

## 2.3 Model Numbers

Model Number	Nominal Diagonal	Aspect Ratio	Viewing Height (in)	Viewing Width (in)	Screen Material	Gain	Case Color	N.W. (lbs)	G.W. (lbs)	Packaging Dimensions (LxWxH)
M180XWH-G	180"	16:9	88.2"	156.9"	MaxWhite®	1.1	White	62.4	80.7	174"x7.5"x8.1"
M180XWV-G	180"	4:3	108.0"	144.0"	MaxWhite®	1.1	White	54.7	77.2	160.4"x7.5"x8.1"

## Section 3: Screen Material Specifications

### 3.1 Characteristics

**MaxWhite®** screen material is the most versatile screen surface for front projection presentations. This material provides the widest possible viewer angles with perfect diffusion uniformity while giving precise definition, image color reproduction and black & white contrast. Screen surface has black-backing to avoid light penetration and can be cleaned safely with mild soap and water. Woven screen material is a multi-layer, cross-array coated with a matte white reflective compound.

### Features & Benefits

- Multi-layer weave and textured surface coating
- Gain: 1.1
- View Angle: 180° (90° ± LR)

- Not compatible with Ultra/Short-throw Projectors
- Mildew Resistant
- Black backing
- Active 3D, 4K Ultra HD, and HDR ready
- Surface can be easily cleaned with mild soap and water
- GREENGUARD® and GREENGUARD® Gold Certified | UL 2818

Specifications	
Thickness	0.41 mm (0.016")
Weight	530 g/m <sup>2</sup>
Maximum Height	3.2 M (10 ft)
On-axis Gain	1.1
Half-Gain Angle	Does not reach half gain

### 3.2 Gain and Viewing Angle

On axis 0° Gain: 1.1  
Viewing Cone: 180°

## Section 4: Execution

### 4.1 Pre-Installation Warning

#### **WARNING!**

Keep the bead chain out of the reach of small children. A child can accidentally hook the bead chain around his/her neck and cause serious injury or even death.

1. **ALWAYS** keep cords and bead chains out of children's reach.

2. **MOVE** cribs, playpens, beds, and any other furniture away from the bead chain. Children can climb on furniture and be able to reach the chain.

3. **INSTALL** the chain tensioner as it serves as a safety device to keep the bead chain from being able to be pulled away from the wall.

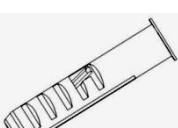

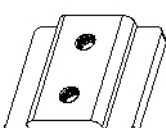

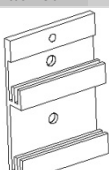

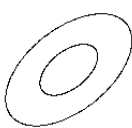

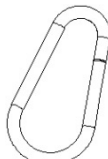

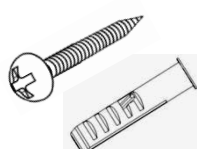

#### **Note:**

Wall screws included with this product are complementary and may not be adequate for all mounting surfaces. Consult with a professional installer or hardware store for proper mounting screws and anchors.

Regardless of the mounting method, the screen should be securely supported so that the vibration or pulling on the viewing surface will not cause the screen case to become loose or fall. The installer must ensure that proper mounting hardware and the fasteners used are of adequate strength and suitable for the mounting surface.

### 4.2 Hardware Parts List

A. M5x60 Screw x4	B. M12 Dry-wall anchor x4	C. Bracket connector x2	D. M5x25MM round head cross screws x2 & M5 nut x2	E. M5x30MM eyebolt screw & M5 nut x2
				
F. Hidden wall bracket x2	G. R18xR6x1 washer x4	H. Snap link x2	I. Bead chain tensioner x1	J. M4x32 Screw x2&M8 Dry-wall anchor x2
				

### 4.3 Installation Instructions

*For installation assistance, please consult a professional Installer. EliteProAV is not liable for faulty installations.*

## A. Wall Mount

### Flush hidden mount (movable position)

This installation method allows the screen to slide horizontally.

1. Determine where the screen will be installed. Then, measure and mark the distance between the top and bottom screw holes from each **hidden wall mount bracket (F)**.
2. Drill a hole on all marked areas and install the brackets with the **dry-wall anchor (B)**, **M5x60 screw (A)**, and a **washer (G)**. Make sure both brackets are properly leveled.
3. Hang the screen by placing the **downward** “catch” located on the back over the brackets **upper** “catch”.
4. After making sure the screen is secured, you can slide it left / right to properly center it in position.
5. Lastly, screw the **M5 screw (D)** into the upper hole of the bracket to add additional support for the screen.

## B. Ceiling Mount

### Suspended

1. Screw the **eyebolt (E)** on the **bracket connector (C)**.
2. Attach the **snap link (H)** through the **eyebolt (E)** and connect it to an eyebolt screw (not included) rated for the screen’s weight.

### 4.4 Bead Chain Tensioner

EliteProAV **Manual Grande®** Series uses a Bead Chain Clutch Operated mechanism to allow the screen material to roll down and up. For the safety of young children, it includes a **Bead chain tensioner (I)** device pre-attached to the bead chain (along with the safety label below). To use this tension clip, thread bead chain through the clip, then attach to wall or window sill so that the bead chain is held taut enough that children cannot pull it away from the wall or fit their head into the loop.

#### Warning for the Safety of Young Children

Young children can STRANGLE in cord and bead chain loops.

1. **ALWAYS** keep cords and bead chains out of children’s reach.
2. **MOVE** cribs, playpens, beds, and any other furniture away from the bead chain. Children can climb on furniture and get to the cord loop.
3. **INSTALL** the bead chain tensioner as it serves as a safety device to keep the bead chain from being able to be pulled away from the wall.

#### 4.5 Bead Chain Tensioner Installation

1. After the screen has been properly installed, allow the bead chain to hang down freely. Then find the best place on your wall to attach the **Bead chain tensioner (I)**.
2. After locating the position of the **Bead chain tensioner (I)**, mark where to drill the holes for the anchors with a pencil.
3. Drill the holes and insert the **M8 Dry-wall anchor (J)**.
4. Tighten the **M4x32 Screw (J)** to the **M8 Dry-wall anchor (J)** when the upper hole of the **Bead chain tensioner (I)** aligns with the hole of **M8 Dry-wall anchor (J)**.
5. Tighten the bottom screw hole as shown below to complete the tensioner installation.

#### 4.6 Screen Operation

**To lower** the screen, grasp the bead chain length closest to the wall and pull downward.

**To raise** the screen, grasp the bead chain length furthest from the wall and pull downward.

**Please note the following points to avoid reducing the life-span of the bead chain.**

1. The chain should be pulled straight down. Do not to pull the chain in any angle outwards or to the sides. In doing so, the chain will scratch the housing of the screen.
2. The chain should be pulled down in a constant motion. **DO NOT** pull and stop the chain rapidly to avoid shaking and damaging the screen which can be dangerous if not properly fastened and secured.
3. When pulling down the screen with the chain, please note there is a limiting device on the bead chain to keep the screen from rolling down too much. Bear in mind that the screen can deploy as far as indicated in the spec sheet. **DO NOT** pull down on the bead chain any harder than needed to deploy and retract the screen. Vigorous operation of the chain can cause damage to the unit.
4. Failure to follow these instructions will void your warranty.

## Life Style

**Section 6: Company Description****6.1 About EliteProAV™**

EliteProAV™ is a the manufacturer of projector screens for the commercial AV sales channel. It is a division of Elite Screens Inc., an ISO9001:2015 certified manufacturer that is presently the leading international brand of CE Retail projector screens with offices located worldwide.

EliteProAV™ provides an array of dedicated commercial grade projector screens for professional integrators. This includes certified products that are also compatible with building codes as well as programs, warranties and trained professionals to assist installers every step of the way. Product is available through a series of regional warehouses located in Southern California, Texas, Georgia, and Maryland. EliteProAV™ is located at 12282 Knott St. Garden Grove, CA 92841. For more information, please call 877-511-1211 or visit <http://www.eliteproav.com>.
