

Unprecedented 5-Year Manufacturer's Warranty

The Elite ProAV™ warranty program provides 5-years warranty service for all Elite ProAV™ customers. This means that Elite ProAV's professional staff and company resources are available to handle any warranty needs should they occur over the duration of up to a half-decade.

The Elite ProAV™ ENR-G program includes a 5% discount for Professional AV resellers, distributors and integrators. This discount is calculated as 5% off for all repeat purchases and is available exclusively to Elite ProAV™ dedicated customers. The program serves a dual purpose of granting our resellers, distributors, and installers an opportunity to increase customer sales margins while offering a discount incentive for our Elite ProAV™ end users at the same time.

Elite Screens Inc. is a US based company with its world headquarters in California and satellite offices in Maryland, Germany, Taiwan, China, Japan, India, and Australia. Elite is an ISO9001:2015 certified manufacturer that specializes in producing retail, commercial and home-theater projection screens for the specific needs of these three sales channels. As a leading American screen company, Elite delivers its promise of award winning quality through cost effective products for today's discerning video enthusiasts. We produce a variety of front, rear, ALR, and acoustically transparent projection screen materials for virtually any projection environment.

Elite ProAV™ is a dedicated manufacturer of projector screens for the commercial AV sales channel. It provides an array of dedicated commercial grade projector screens for professional integrators. This includes certified products that are also compatible with building codes as well as programs, warranties and trained professionals to assist installers every step of the way. Product is available through another regional warehouse located in Maryland.

Elite ProAV™ is a division of Elite Screens Inc., an ISO9001:2015 certified manufacturer that is presently the leading international brand of CE Retail projector screens with offices located worldwide.

Manual Tab-Tension Series

EliteProAV™ presents the Manual Tab-Tension Series, as its premium grade non-electric large venue projector screen which features a manually operated bead chain clutch mechanism. It fulfills a need in many facilities for a tough, versatile design that can be easily installed and used where there is no available power source. This is essential for venues such as meeting rooms, conference halls, gymnasiums, college forums, church sanctuaries, training facilities, and large meeting rooms.

Saker Tab-Tension CLR®-S

The Saker Tab-Tension CLR®-S Series is an electric motorized retractable projector screen that uses an Ambient Light Rejecting material. The ALR material is formulated to sustain excellent color reproduction and contrast for enhanced picture quality in environments with little control over room lighting.

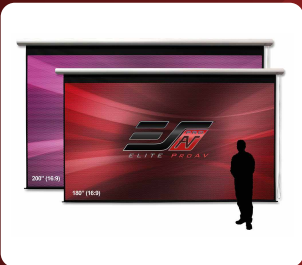

Tension Pro Series

The TensionPro Series is a large-venue motorized retractable tab-tensioned front projection screen. Available in sizes from 200" - 300" in a 16:9 aspect ratio and includes IR/RF remote controls, and a 12 volt projector trigger.

Manual Grande® Series

The Manual Grande® Series is a Large-sized manually operated retractable screen that uses a bead chain clutch system. It employs a very swift rolling mechanism that allows it to stop at any point to prevent from being raised or lowered too far.

Saker Series

The Saker Series is an electric projection screen that embodies all the virtues of quality, durability, and aesthetic value. It utilizes our MaxWhite® Fiberglass (FG) material which has a wide viewing angle. Standard features include a wireless 5-12 volt trigger, IR/RF remotes, and detachable manual keypad switch.

Evanescence Tab-Tension

The Evanescence Tab-Tension is a versatile in-ceiling projection screen that conveniently disappears from view when not in use. It can be installed from within the above-ceiling airspace or from below thanks to its removable base panels that were originally designed for the European market.

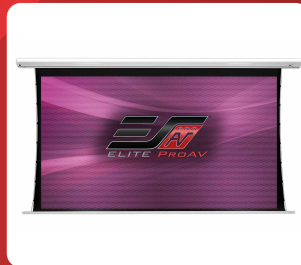

CineTension Plus Series

CineTension Plus is a robust and well made electric motorized projector screen. Its 1.1 gain tab-tensioned material provides uniform flatness and has a wide viewing angle. A full IR/RF, RJ45 and 5-12 volt trigger control package is included.

The Saker Tab-Tension Series includes a tab-tension system with MaxWhite® Fiberglass material to maintain flatness all across the projection surface. Standard features include a wireless 5-12 volt trigger, IR/RF remote control package, and a detachable manual keypad switch.

Saker Tab-Tension Series

Large in-ceiling projection screen suitable for big size rooms. It is the ideal companion for medium to large size auditoriums, gymnasiums, and banquet/reception rooms. The Evanescence Plus includes our GREENGUARD® Certified MaxWhite® FG front projection material.

Evanescence Plus Series

Kestrel Stage Series

A large venue portable, free standing electric projector screen. As an added value, a matching roadie flight-case with detachable velvet skirt is included to complete the arrangement.

Kestrel Stage NTC Series

The Kestrel Stage NTC Series is a portable large venue, free-standing projector screen. It is ideal for Rental & Staging or other commercial (ProAV) applications. This series, unlike the Kestrel Stage Series, does not include the detachable matching ATA case and skirt.

Saker Plus Series

Saker Plus Series is a Large Venue electric/motorized projection screen. Its features include IR and RF remote controls, a wireless 12 volt trigger and a detachable keypad switch for manual Up/Stop/Down control. The MaxWhite® front projection material is GREEN-GUARD® Gold Certified.

Tripod Stage Series

This Series takes the traditional tripod design and enhances it to create a top-notch portable "big screen" presentation that is ideal for small or large venues. The addition of revised features and a professional drape kit refines a traditional concept into a bigger and better solution for modern large venue presentations.

ezFrame Plus Series

The ezFrame Plus series is our newest fixed frame projection screen line designed for applications requiring large presentations.

Aeon CLR®-S Series

The Aeon CLR-S is an EDGE FREE® fixed frame projection screen that uses Elite's CineGrey 5D®, an angular reflective front projection material designed to reject ambient light while maintaining superb picture quality.

Yard Master Pro Series

The Yard Master Pro is an outdoor or indoor folding-frame projection screen. Its lightweight yet durable aluminum frame allows it to be setup effortlessly. Its free standing design allows it to be portable and versatile for all types of applications.

The ProFrame Series is Elite ProAV's fixed frame which comes in a matte finish with our award-winning CineWhite® front projection material.

ProFrame Series

WhiteBoardScreen™ Thin Edge

The versatile combination of whiteboard and projection screen features and improved thin-edge design with accessories tray. This is the ideal presentation tool for your training facility. It is a leading edge combination of two essential classroom visual aids.

Featured Screen Materials on EliteProAV Products

CineWhite®

Gain: 1.1
View Angle: 180°

Tensioned Matte White has broad light dispersion through diffusion uniformity, black & white contrast and true color rendition making it the most versatile in Elite's tension screen product lines.

CineWhite® UHD

Gain: 1.15
View Angle: 180°

Tensioned Matte White reference-grade 1.15 gain projector screen material that is certified by the world renowned Imaging Science Foundation for its superb color temperature, contrast and black level performance.

MaxWhite®

Gain: 1.1
View Angle: 180°

The most versatile screen surface for front projection presentations. This material provides the widest possible viewer angles with perfect diffusion uniformity while giving precise definition, image color reproduction and black & white contrast.

MaxWhite® Fiberglass

Gain: 1.1
View Angle: 180°

A fiberglass material backed for added stiffness which provides the flattest possible non-tensioned screen surface with universal applications. The screen surface has a black-backing to eliminate light penetration, is mildew resistant and washable with mild soap and water.

VersaWhite

Gain: 1.1
View Angle: 180°

Matte White screen material coated with a scratch-resistant nanotech resin and transparent dry-erase layer for use as a white board while keeping uniform diffusion and enhancing true color rendition.

CineGrey 5D®

Gain: 1.5
View Angle: 80°

An angular reflective front projection material designed to reject ambient light while maintaining superb picture quality. The perfect solution for rooms that have little or no control over incidental light.

WraithVeil

Gain: 2.2
View Angle: 160°

rear projection screen material with a special surface coating that enhances color reproduction and black level contrast with wide uniformity for large audiences.
