

## PRO FRAME SERIES

Elite ProAV's **Pro Frame** is a fixed frame projection screen for commercial applications. Its frame is of \*matte-black anodized aluminum and uses Elite's award winning CineWhite® (matte white) front projection material. The Pro Frame features a clean anodized aluminum framework that is best suited to commercial environments. The 2.4 inch thick framework has a split-frame 6 piece design that greatly reduces shipping costs while making it easier to navigate the tight confines encountered in most job sites.

### Screen Material

- CineWhite® tensioned front projection material with 1.1 Gain
- Wide 180° viewing angle uniformly reflects a bright image across entire surface for superior off-axis performance and versatility
- Black backing on material eliminates light penetration
- WraithVeil® 2.2 Gain rear projection material with 160° viewing angle
- 4K/8K Ultra HD compatible
- Available in the following range of diagonal sizes:
  - 100", 120", 135", and 150" (16:9) - CineWhite® Material
  - 137", 144" (16:10) - CineWhite® Material
  - 128", 144" and 164" (16:10) - WraithVeil® Material

### Design & Installation

- Permanently tensioned fixed frame projection screen
- 2.4" matte black anodized aluminum frame
- 6-piece aluminum "split-frame" design reduces shipping costs and enhances job-site accessibility
- Push-clip design fastens material to the frame for full tension uniformity
- Installation kit includes: Woods screws & anchors, Wall Brackets, Screwdriver, Mallet
- 5-year premium manufacturer's warranty
