

The **Pro Frame Thin Series** has an appearance that nicely complements any interior decor with its clean, elegant design. It provides reference quality images using Elite's CineWhite® front projection material. This projection surface provides top-tier performance in producing accurate color rendition that exceeds the highest requirements of color purists as well as the industry's leading integrators.

CineWhite® (Tension Matte White) has broad light dispersion through diffusion uniformity, black & white contrast and true color rendition making it the most versatile in Elite's tensions screen product lines. This tension PVC surface is the best choice for today's high-contrast ratio projectors in commercial or residential presentations.

Screen Material

- CineWhite® 1.1 gain with 180 degree wide viewing angle
- Standard matte white front projection material (For light controlled environments)
- Wide Viewing angle uniformly reflects a bright image across entire surface for superior off-axis viewing
- Delivers precise color fidelity for the most demanding reference quality applications
- Black-backing eliminates light penetration
- 4K Ultra HD, Active 3D, and HDR Ready
- Available in the following range of diagonal sizes:
 - 100", 120" and 135" in 16:9 format

Design & Installation

- Internal framework with wraparound tensioned projection material
- Aluminum lightweight split-frame design
- Sliding wall mount brackets to precisely center the installation
- Micro-thin aluminum black bezel
- Smaller footprint maximizes viewing area
- LED edge backlighting kit included with Infrared (IR) remote for added visual appearance
- 5-year manufacturer's warranty
