

PRO FRAME SERIES - REAR MODELS

Elite ProAV's **Pro Frame** is a fixed frame projection screen for commercial applications. Its frame is of matte-black anodized aluminum and uses Elite's WraithVeil® rear projection material. The Pro Frame features a clean anodized aluminum framework that is best suited to commercial environments. The 2.4 inch thick framework has a split-frame 6 piece design that greatly reduces shipping costs while making it easier to navigate the tight confines encountered in most job sites.

Screen Material

- WraithVeil® rear projection material with 2.2 Gain
- Surface coating enhances color reproduction and black level contrast
- 160° viewing angle uniformly reflects a bright image
- 4K/8K Ultra HD compatible
- Available in the following range of diagonal sizes:
 - 128", 144" and 164" (16:10) – WraithVeil® Material
- 5-year premium manufacturer's warranty

Design & Installation

- Permanently tensioned fixed frame projection screen
- 2.4" matte black anodized aluminum frame
- 6-piece aluminum "split-frame" design reduces shipping costs and enhances job-site accessibility
- Push-clip design fastens material to the frame for full tension uniformity
- Installation kit includes: Woods screws & anchors, Wall Brackets, Screwdriver, Mallet
