

SAKER TAB-TENSION DARKUST

The **Saker Tab-Tension DarkUST** is a Ceiling Light Rejecting (CLR®) projector screen that is made specifically for UST (ultra short-throw) projectors. It is designed for small spaces where a standard long throw projector cannot be accommodated. In addition to this, the ambient light rejecting technology allows for bright room installations such as boardrooms, conference rooms or training facilities. The DarkUST material absorbs overhead lighting as well as side lighting to offer clear, contrast rich imagery.

Screen Material

- DarkUST Ceiling Light Rejecting® material absorbs up to 95% of overhead lighting
- 100x contrast enhancement over standard matte white screens
- Multi-layer optical structure filters out ambient light for superior picture quality
- Ultra-wide viewing angle allows viewers to spread out while maintaining uniform picture quality
- Black backing eliminates light penetration
- Black masking borders on top and bottom absorb projector overshoot and enhance picture contrast
- Available in diagonal sizes 100" and 120" in 16:9 HDTV aspect ratio

Controls, Design & Installation

- Durable aluminum black casing with parallel grooves
- Tab-tension design helps maintain a flat projection surface
- Ships fully assembled ready to plug and play
- Flush wall/ceiling floating brackets included permit wood stud installation and slide horizontally for proper centering
- Includes eye-bolts for a suspended installation
- Internal Radio Frequency & Infrared receivers with IR/RF remotes
- Detachable 3-way wall switch keypad, IR "eye" sensor, and wired projector trigger
- Wireless 5-12 volt trigger enables Drop/Rise operation to synchronize with the projector's power cycle
- 5-year limited manufacturer's warranty
