

TRIPOD TAB-TENSION PRO DARKUST® 2

The **Tripod Tab-Tension Pro DarkUST® 2** is a portable Ceiling Light Rejecting (CLR®) tripod projection screen. It is designed to exclusively work with tabletop mounted ultra-short throw projectors. The tab-tension system provides a flat viewing surface for ripple-free projection images. The DarkUST® 2 front projection surface has a micro lenticular structure that can absorb up to 85% of overhead light while reflecting side light to combat the washout effect. This is the perfect solution for boardroom, training facilities or lecture hall presentations or any other environments in which light cannot be controlled. A tripod skirt is included to provide an elegant finish to your presentations.

Screen Material

- DarkUST® 2 Ceiling Ambient Light Rejecting material absorbs up to 85% of overhead lighting
- Wide viewing angle allows viewers to see a clear and bright uniform picture from any angle
- Micro-serriform lenticular structure filters out ambient light that produces contrast rich images
- Compatible ONLY with tabletop mounted ultra-short throw projectors
- Project within a short distance without shadowing the picture
- Black backing eliminates light penetration

Design & Operation

- Top/Bottom black masking borders enhances picture contrast
- 55" Diagonal in 4:3 aspect ratio
- Pull-up retractable design includes keystone eliminator
- Lightweight black housing includes carrying bag for protection, portability, and storage
- Black tripod skirt included for an elegant and professional presentation
- Tab-tension design provides a flat and taut projection surface
- Top/Bottom black masking borders absorb projector overshoot
