

The Yard Master Pro 2 is an outdoor or indoor folding-frame projection screen with variable height settings to accommodate large venues. Its lightweight yet durable aluminum frame allows it to be setup effortlessly.

The Yard Master Pro 2 includes both front (CineWhite) and rear projection (WraithVeil) materials for easy convenient projection set-ups. Each projection material includes a sleeve for protection. The screen material stretches over the frame to create a uniform flat and taut projection surface. A carrying bag is included for travel and storage and a wheeled version is standard for the 180" and 200" models.

Rather than deal with the "either-or" now you can be prepared for virtually any projection scenario encountered by mobile presenters and event coordinators.

Screen Material & Warranty

- CineWhite 1.1 Gain front projection matte white material with wide diffusion uniformity
- Black backing eliminates light penetration (CineWhite) for superior color reproduction
- WraithVeil 0.8 Gain rear projection material
- Black masking borders enhance picture contrast and absorb projector overshoot
- Available in diagonal sizes 145", 180" and 200" in 16:9 aspect ratio
- 5-Year manufacturer's warranty

Design & Installation

- Strong, lightweight collapsible frame with detachable T-legs included
- Tool-free design is easy to setup and breakdown
- Buttons on edge of screen material snaps on to frame
- Corner pull-tabs on material allows material to stretch for an easy installation
- Stakes, rope, and support rings included for stability against mild wind conditions
- AT legs included for additional support
- Individual protection pouch included for each projection screen material
- Carrying bag included fits entire product for protection and portability (wheeled carrying bag for 180" and 200" models)
