

CineWhite® (Tension Matte White) has broad light dispersion through diffusion uniformity, black & white contrast and true color rendition making it the most versatile in Elite's tensions screen product lines. This tension PVC surface is the best choice for today's high-contrast ratio projectors in commercial or residential presentations. The **CineWhite®** material equals the performance to our MaxWhite® product, but improves the experience with the superior surface flatness. Uniform diffusion surface has black-backing to eliminate light penetration and is easily washable with mild soap and water.

Elite ProAV® Series: Evanesce Tab-Tension, Pro Frame Plus, CineTension 2, CineTension Plus

Screen Material

- Multi-layer PVC (Polyvinyl chloride) with texture and surface coating
